Developments in Europe

(Test & Certification in the Fire & Alarm Sector)

- ✓ Manufacturers dislike costs, lead times and “specials” of National Schemes;
- ✓ EU Legislation;
- ✓ European Accreditation/Designation;
- ✓ Availability of European Standards;
- ✓ Competition in 3rd party T & C;

C & T Schemes in Europe

European Designation

Regulations EC/765/2008 & EC/764/2008

Product Directives

- EA coordinates;
- AB per Member State;
- Designations as NB:

By the MS
after OK of their AB

Sector Schemes

- EA decides;
- Scheme per Sector;
- Designations as CAB:

By the Scheme owner
after OK of an AB

CERTALARM Scheme is endorsed by the EA as a Sector Scheme since February, 17^e 2011

Accreditation

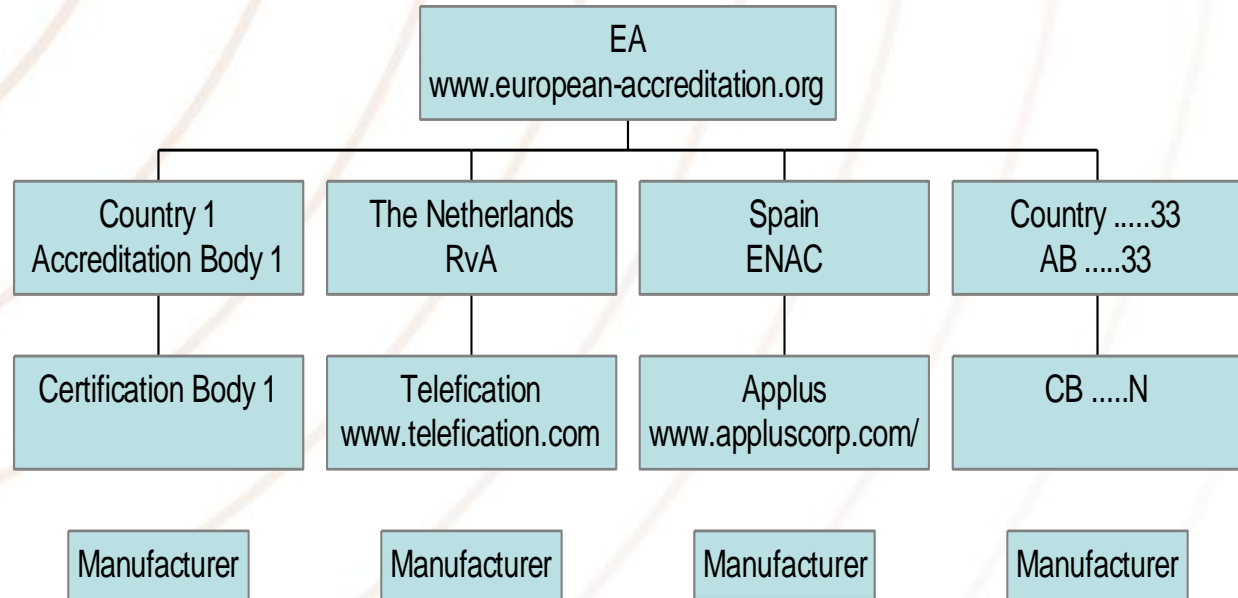

(The Quality Umbrella in Europe)

Multilateral Agreement (MLA)

Accreditations

Certification
and testing

Products

Manufacturer makes his own choice in which country he starts product certification depending on specific demands in that market

CertAlarm structure

Certification Body CCB
Partner of **CertAlarm**

In any country

Test Laboratory RTL
Partner of **CertAlarm**

In any country

Manufacturer

In any country

Free choice of test laboratory, RTL

- Mutual recognition of product testing -

Free choice of certification body, CCB

Principles of CertAlarm

One Test, One Certificate, One Quality Mark, One Inspection
for the whole of Europe

Based on:

- ✓ Endorsement
- ✓ Participation
- ✓ Outsourcing
- ✓ EN standards
- ✓ Quality
- ✓ Competition

Quality level of the Scheme

The quality level of the CERTALARM Scheme is what the market is asking for.

For products:

SYSTEM 5 according to ISO/IEC Guide 67.

For services (in the future):

SYSTEM 6 according to ISO/IEC Guide 67.

Full competition

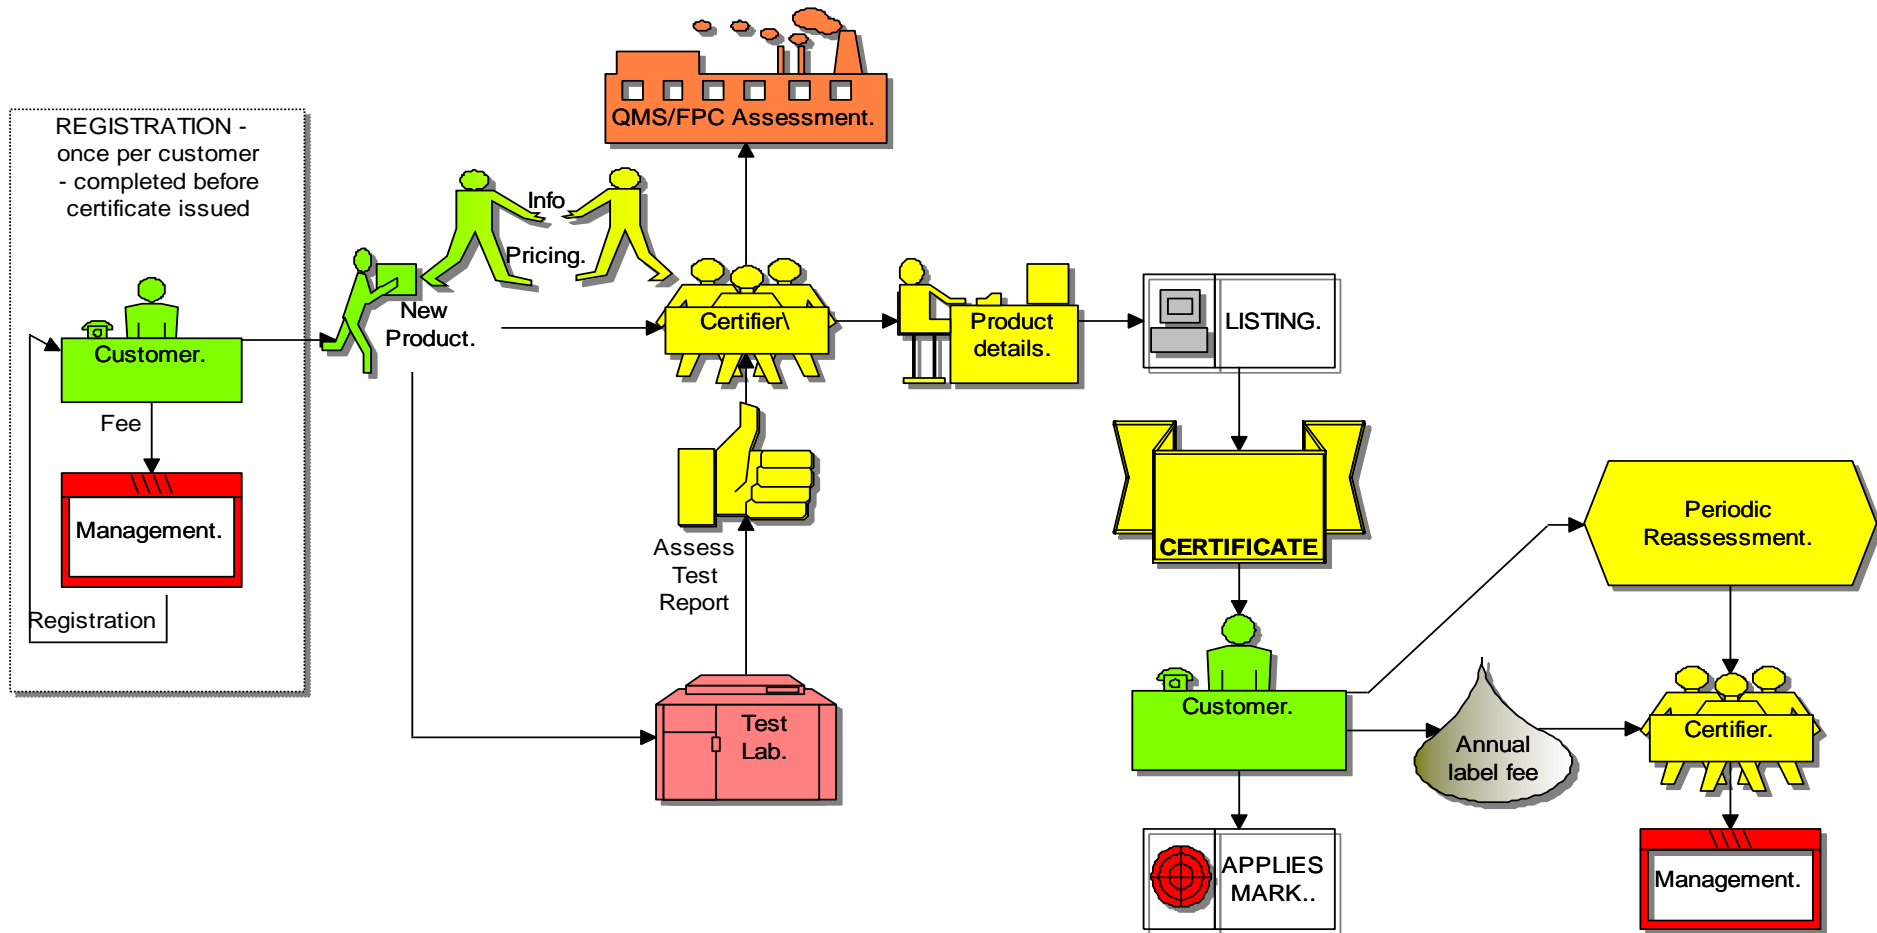

- Between Recognised Test Laboratories (RTL);
- Between Recognised Inspection Bodies (RIB);
- Between Contracted Certification Bodies (CCB).

Implying that the manufacturer can choose the RTL (for products) or RIB (for services) of his choice, while keeping the possibility to go with the conformity results to any CCB!

The manufacturer contracts a RTL or RIB for obtaining conformity results and a CCB for obtaining a **CERTALARM** certificate and the right to use the **CERTALARM** logo.

Certification Process

Benefits of a CertAlarm certificate

- **Authorities:**
 - Definitely removes intra-EU trade barriers created by country-specific approvals
- **Insurers:**
 - A CertAlarm certificate simplifies acceptance and conditions
 - European quality standards leads to better performance = Less claims
- **Certification bodies (CCB's):**
 - Only one accreditation needed
 - Strengths of competition throughout Europe
- **Test houses (RTL's)**
 - Test reports recognized by all CCB's
 - Strengths of competition throughout Europe

Benefits of a **CertAlarm** certificate

- **Manufacturers:**
 - See slides before in this presentation
 - One test, one certificate, one certification scheme for Europe
 - Less approval time and costs
 - Faster market introduction for new products, quicker sales
- **Installers:**
 - Comparability of products and continues compliance within the certification agreement, guaranteed compliance
 - Selection on products with a **CertAlarm** certificate makes the purchasing of products more convenient
- **End users:**
 - Demanding products with a **CertAlarm** certificate makes life easier in every tender process
